Tel: 714.633.3732 Fax: 714.633.3917

Our concern for environmental compliance has become part of our corporate culture. Preserving our world for future generations requires commitment and dedication. Our planters meet qualifications for LEED guidelines. Air quality from our plant is in compliance with EPA regulations that reduce the escape of chemicals into the atmosphere. We continuously look for ways to improve our manufacturing processes and make responsible environmental choices.

Perforated Sub-Floor Water Reservoir

An internal fiberglass, perforated "sub-floor" is laminated into the planter bottom 3" above the planter floor. This partition allows water to drain into the reservoir below. By watering the plant's root ball, the reservoir acts as an irrigation system. Upon request an optional drain fitting with screw cap is provided for easily controlled drainage. A hose or permanent drain line may be connected to this fitting to ensure that water will not rise above the sub-floor. A siphon tube riser is optional.

Planter Options

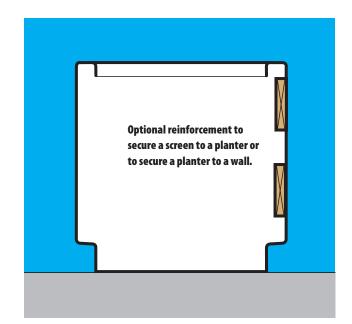

Casters

Heavy-duty swivel casters are optional for many planters- contact Old Town Fiberglass for applicability and up-charge.

Reinforcement

If a planter is to be fastened to a wall or if you wish to fasten a screen to a planter we recommend appropriate internal reinforcement. Please discuss your application with Old Town Fiberglass and we will recommend appropriate structural enhancements. Extra charges will apply and will be quoted by Old Town Fiberglass at time of order.

Note:

Please contact us if you don't see the shape or size of planter you need—we welcome custom orders. Planter irrigation and custom internal modifications available. A graffiti-resistant coating is available with upcharge. All orders are subject to the Terms and Conditions outlined in this Price List. Specifications are available on our web site.

Attachment of planters to floors, walls or to other planters.

If a planter is to be fastened to a wall or floor or if you wish to fasten a screen to a planter, appropriate internal reinforcement is recommended. Plywood reinforcing panels laminated into the planter at the time of manufacture will ensure that the mechanical attachment is secure and will not compromise the structural integrity of the planter. See illustrations for typical plywood placement (shown in orange). Please discuss your application with Old Town Fiberglass and we will recommend appropriate structural enhancements. Extra charges will apply and will be quoted by Old Town Fiberglass at time of order.

Old Town Fiberglass recommends that corrosion-resistant (stainless steel or equivalent) bolts, over-sized flat washers and hex nuts be used with corrosion-resistant anchors or expansion shields. Select a bolt diameter appropriate for the size and weight of the planter and the number of bolts used. To prevent leaks and water migration into the plywood panels, all exposed hardware inside the planter must be completely covered and sealed after installation with a flexible, waterproof mastic or equivalent sealant.

Note:

Please contact us if you don't see the shape or size of planter you need—we welcome custom orders. Planter irrigation and custom internal modifications available. All orders are subject to the Terms and Conditions outlined in this Price List. Specifications are available on our web site.
